

Vishnu PM

Full Stack .NET Developer | ERP Systems | ASP.NET Core | SQL Server

📍 Palakkad, Kerala, India ✉ pmvishnu7007@gmail.com ☎ 8086858701
🌐 <https://www.linkedin.com/in/vishnupm17590> 🐙 <https://github.com/vishnu-pm>

Professional Summary

Full Stack .NET Developer with 1.5+ years of experience building ERP systems, billing software, and scalable business applications using ASP.NET Core, ASP.NET MVC, C#, SQL Server, and Entity Framework. Experienced in designing RESTful APIs, database architecture, authentication systems, and Azure-based deployments. Strong background in ERP development, business automation systems, and performance optimization using LINQ and SQL stored procedures.

Career Highlights

- Developed enterprise-level applications using ASP.NET MVC and .NET Core for ERP and CRM systems.
- Designed and implemented RESTful APIs for secure data exchange between systems.
- Improved database performance by optimizing SQL Server queries and stored procedures.
- Implemented authentication and authorization using JWT and ASP.NET Identity.
- Collaborated with development teams in Agile environments to deliver production-ready applications.

Experience

Codeedex Technologies

Developer

09/2025 – Present
Perinthalmanna, Kerala

- Developed 5+ ERP modules including inventory, billing, customer management, and reporting systems using ASP.NET MVC and SQL Server.
- Designed and implemented RESTful APIs for secure communication between ERP modules.
- Optimized SQL Server queries and stored procedures to improve application performance.
- Built full-stack features using Razor, JavaScript, and ASP.NET MVC.
- Deployed and maintained applications in Microsoft Azure environments.

Tactiot Solutions

Developer

04/2024 – 09/2025
Thrissur, Kerala

- Designed, developed, and maintained web applications with a focus on scalability.
- Delivered high-quality solutions using C#, SQL, and ASP.NET frameworks.
- Resolved technical issues to ensure smooth project deployment.
- Actively learned and adopted new technologies for continuous improvement.

Education

Bachelors in Business Administration

VTB Sreekrishnapuram College

03/2020 – 03/2023

Certification

Data Analytics

- **Certification in Data Analytics – ExcelR Institute (2024)**

Skills

Technical Skills

- Languages: C#, JavaScript
- Frameworks: .NET 6/7, ASP.NET Core, ASP.NET MVC
- Frontend: HTML5, CSS3, Bootstrap, jQuery
- Backend: ASP.NET Core, ASP.NET MVC, .NET Framework, Web API
- Database: SQL Server, MySQL
- ORM: Entity Framework, LINQ
- Authentication: JWT, ASP.NET Identity
- Tools: Visual Studio, Git, GitHub, Azure, IIS

Core Competencies

- ERP Development
- API Development
- API Integration
- Database Optimization
- Authentication & Authorization
- Agile Development
- Scalable Application Architecture

Projects

POKY - ERP for Cloth Branding Company

2026

(ASP.NET MVC, C#, SQL Server)

- Engineered a full-scale ERP system tailored for a cloth branding organization.
- Implemented modules including Customer Management, Expense Tracking, Material Movement, Warehouse Management, Customer Payments, Warehouse Payments, and User Management.
- Designed relational database schema ensuring data integrity and optimized query performance.
- Implemented role-based access control for secure multi-user environment.
- Structured the application using layered architecture for scalability and maintainability.

MADEENA Interlocks - Customized Business Web Application

2026

(ASP.NET MVC, C#, SQL Server)

- Developed a tailored web application to manage operational workflows for an interlocks manufacturing business.
- Built modules for Customer Handling, Expense Management, Material Tracking, and Payment Monitoring.
- Designed optimized SQL Server database schema to improve reporting and transaction accuracy.
- Implemented secure authentication and role-based authorization mechanisms.
- Delivered a modular and maintainable solution aligned with client-specific business requirements.

Billing ERP (BSW) - ERP + Billing Software Development

2025

(ASP.NET Core MVC, SSMS, C#)

- Developing an integrated ERP + Billing system named Billing ERP (BSW) using ASP.NET Core MVC and SQL Server.
- Implementing modules including Product Management, Vendor & Customer Handling, Billing, Inventory, Purchase, and Reports.
- Designed database architecture to ensure optimized data storage, relational mapping, and secure transactions.
- Added features such as barcode/SKU generation, GST calculation, invoice printing, and role-based authentication.
- Focused on modular structure, layered architecture, and reusable components for scalability.

Invobi - ERP Software Development

05/2024

(.NET, ASP.NET Core MVC, SSMS)

- Developed a complete ERP software named Invobi using ASP.NET Core MVC and SQL Server Management Studio.
- Integrated core modules such as Inventory, Billing, Sales, HR, and Finance to automate business operations.
- Designed scalable layered architecture with RESTful APIs ensuring smooth data flow.
- Implemented role-based authentication and responsive UI to enhance operational efficiency.
